

13.00 – 15.55 Mostafa Benyahia, DFAS educational committee & guest speakers

The posttraumatic stiff ankle

Stiff pain eliciting ankles with a traumatic background, are a common and often difficult clinical presentation in foot and ankle out-patient clinics. We present a walk-through of ankle trauma, 1st and 2nd line of treatment, including rehabilitation from a foot and ankle perspective.

Revision of the Danish orthopaedic specialist training program - Foot and Ankle course.

DFAS educational committee presents ongoing work and thoughts going into the revision of the foot and ankle course; with an outline of a novel approach to future learning and teaching methods.
